PRESS RELEASE – Kaymar 4x4 Accessories

Jeep Wrangler JK Rear Bar (Part #K3750)

Just into production after an in-depth and rigorous design and testing program the JK rear bar/tow bar combination and accessory mounting systems will be ready for sale and installation from Kaymar resellers in just weeks.

Typical of all Kaymar bars this one is tough and functional while enhancing the vehicle's departure angle and also the design lines. It can be configured with a single spare wheel carrier for up to a 35 inch wheel or with dual carrier arms for a spare wheel up to 33 inch plus jerry can in combination.

Innovations built into this bar include the all new gas strut assisted carrier arm opening system with hold-open lock for increased safety in rough terrain, sealed LED lighting modules for reliable longlife performance in all conditions, adjustable spare wheel mount to accommodate wider than standard tyres, heavy duty carrier arm pivots with dust and weather sealed roller bearings to maintain a lifetime of smooth operation and a tough carrier arm locking mechanism with rock solid weight support brackets to ensure a vibration free and reassuringly definite lockup during travel.

K3750 JK Rear Bar \$1635.00 inc. GST

Also available are optional mounting brackets for HF aerial, telescopic work light, hi lift jack and number plate.
