Mitsubishi Triton ML Rear Step/Towbar

Mitsubishi has released Triton with a bold new look. Kaymar's new Rear/Step Bar product adds a dash of adventure to its appearance and huge practical enhancement in spare wheel and fuel carrying capacity with solid rear end protection.

This bar reflects Kaymar's evolutionary progress of incorporating proven new technologies into new designs. Featuring LED lights, gas strut assistance and advanced finishing techniques.

LED signal lights bring the expected long life and low power benefits of LED technology but also incorporate bright white reversing lights on both sides of the bar.

The LED modules are fully sealed against both weather and dust and highly resistant to damage from vibration.

Less obvious to the eye, though a fabulous innovation, is the addition of gas struts to assist the opening and holding open of the carrier arms when loaded with heavy spare wheels or full jerry cans.

Once fully open the carrier hold open lock is automatically engaged.

And to improve both safety and comfort the carrier arm locking handles are rubber dipped to give an overall non-slip finish and give ungloved hands protection from cold, heat and uncomfortable handle edges.

Finished with zinc electroplating for corrosion protection and powder coated in black the bar matches in with the styling of the Triton and is an investment for the lifetime of the vehicle.

Accessories available include – UHF/HF Aerial bracket, Hilift Jack Bracket, Telescopic Work Light Bracket, Jerry Can and Spare Wheel carriers.

K3800	Bar	\$1747.00 inc GST
KITTR-L-JCS	Bar Kit	\$3200.00inc GST
